The screenshot displays the IBM Cloud dashboard interface. At the top, there's a navigation bar with the IBM Cloud logo, a search bar, and links for 'Catalog', 'Manage', and 'Aravind S.E's Account'. Below this, the 'Dashboard' section features a 'For you' area with several service tiles: 'Build' (Explore IBM Cloud with this selection of easy starter tutorials and services), 'Set up your IBM Cloud account' (Learn how to set up your IBM Cloud account, manage your account settings, organize resources, and control access to those resources), 'Build a Virtual Private Cloud (VPC)' (Upgrade to a paid account to create your own protected space in the IBM Cloud), 'Get Started with Watson Studio' (Get started with using AI and Cloud Object Storage in 15 minutes), and 'Use Speech to Text' (Easily convert the human voice into the written word for voice control, transcription, etc. with Speech to Text). Each tile includes a 'Getting started' or 'Popular' button and a time estimate. Below the 'For you' section, there are three more tiles: 'User access' (Manage users), 'News' (Unified Key Orchestrator Now Supports Easy Multicloud Key Management for Google KMS, TrustRadius Best Software: Five IBM Offerings to Make the List), and 'Planned maintenance' (View all). The bottom of the dashboard shows a system tray with weather information (85°F, Haze), system icons, and the date/time (11:33 AM, 07-11-2022).

CREATE NODE-RED SERVICE

The screenshot shows the IBM Cloud Developer console. The browser address bar displays the URL: `cloud.ibm.com/developer/appservice/create-app?starterKit=59c9d5bd-4d31-3611-897a-f94eea80dc9f&defaultLanguage=undefined`. The page header includes the IBM Cloud logo, a search bar, and navigation links for Catalog, Manage, and the user's account (Aravind S.E.'s Account). The main content area is titled 'About' and 'Create'. The 'About' section includes details about the starter kit, source code links (GitHub, Terms, Tutorial), and an overview of the service. The overview states that the starter kit provides a pre-configured Node-RED application, including a Cloudant service to store the application flow configuration. It also lists the help provided by the starter kit: generating an application with Node-RED, generating files for deployment to Cloud Foundry or a DevOps Pipeline, and connecting to provisioned services. A 'What's included?' section highlights the inclusion of Cloudant, which is free to start. A 'Get started' button is prominently displayed at the bottom of the main content area. The right sidebar contains an 'ASK A QUESTION' button. The bottom of the screen shows a Windows taskbar with various application icons and a system tray displaying the date and time (03:05 PM 07-11-2022).

Overview

This starter kit provides a pre-configured Node-RED application, including a Cloudant service to store the application flow configuration. Add services, generate and download the code, use the IBM Cloud Developer Tools CLI to run and debug locally, then deploy to Cloud Foundry or a DevOps Pipeline.

This starter kit will help you

- Generate an application with Node-RED
- Generate an application with files for deploying to Cloud Foundry or a DevOps Pipeline
- Connect to provisioned services

What's included?

Cloudant

The screenshot shows the 'Create' page for the Node-RED service in the IBM Cloud Developer console. The browser address bar displays the same URL as the previous screenshot. The page header is identical. The main content area is titled 'Tags' and 'Platform'. The 'Tags' section includes a search bar with examples: `env:dev, version-1`. The 'Platform' section shows 'Node.js' selected. The 'Service details' section includes the 'Cloudant' service details. The 'Region' is set to 'London' and the 'Resource group' is set to 'Default'. The 'Pricing plan' is set to 'Lite'. There are links for 'Pricing details' and 'Terms'. At the bottom of the main content area, there are 'Cancel' and 'Create' buttons. The right sidebar contains an 'ASK A QUESTION' button. The bottom of the screen shows a Windows taskbar with various application icons and a system tray displaying the date and time (03:05 PM 07-11-2022).

Node-RED on IBM Cloud

Node-RED

Flow-based programming for the Internet of Things

Node-RED is a programming tool for wiring together hardware devices, APIs and online services in new and interesting ways.

This instance is running as an IBM Cloud application, giving it access to the wide range of services available on the platform.

More information about Node-RED, including documentation, can be found at nodered.org.

Go to your Node-RED flow editor

CREATE NODE-RED SERVICE

The screenshot displays the Node-RED web interface. The top bar includes the Node-RED logo, a 'Deploy' button, and user profile icons. The left sidebar, titled 'filter nodes', contains two categories: 'common' and 'function'. The 'common' category lists nodes like inject, debug, complete, catch, status, link in, link call, link out, and comment. The 'function' category lists 'function' and 'switch'. The main workspace, labeled 'Flow 1', shows a flow with two nodes: an 'inject' node (blue) with the text 'Hello Node-RED!' and a 'msg payload' node (green). A line connects the output of the inject node to the input of the msg payload node. The right sidebar, titled 'info', shows a search bar for flows and a list of flows. The first flow, 'Flow 1', is selected and highlighted in orange. Below the list, the details for 'Flow 1' are shown, including its ID '2443324d77d67b7c' and a search bar for nodes with the placeholder text 'Search for nodes using ctrl-f'.
